on Zones A or V, where no BFE is provided on the FIHM, and the community has established a bridge	
he community's BFE: feet NGVD (or other FIRM datum-see Section B, Item 7)	
SECTION C BUILDING ELEVATION INFORMATION	
FIRM Zones A1-A30, AE, AH, and A (with BFE). The top of the reference level floor from the selection of A1-A30, AE, AH, and A (with BFE). The top of the reference level floor from the selection of A1-A30, AE, AH, and A (with BFE). The bottom of the lowest horizontal structural members the selected diagram, is at an elevation of A1-A30, AE, AH, and V (with BFE). The bottom of the lowest horizontal structural members the selected diagram, is at an elevation of A1-A30, AE, AH, and A (with BFE). The bottom of the lowest horizontal structural members to be low A20. The floor used as the reference level from the selected diagram is A30. FIRM Zone A0. The floor used as the reference level from the selected diagram is A31. FIRM Zone A0. The floor used as the reference level from the selected diagram is A32. FIRM Zone A0. The floor used as the reference level from the selected diagram is A33. FIRM Zone A0. The floor used as the reference level from the selected diagram is A33. FIRM Zone A0. The floor used as the reference level from the selected diagram is A33. FIRM Zone A0. The floor used as the reference level from the selected diagram is A33. FIRM Zone A0. The floor used as the reference level from the selected diagram is A33. FIRM Zone A0. The floor used as the reference level from the selected diagram is A33. FIRM Zone A0. The floor used as the reference level from the selected diagram is A33. FIRM Zone A0. The floor used as the reference level from the selected diagram is A33. FIRM Zone A0. The floor used as the reference level from the selected diagram is A33. FIRM Zone A0. The floor used as the reference level from the selected diagram is A33. FIRM Zone A0. The floor used as the reference level from the selected diagram is A33. FIRM Zone A0. The floor used as the reference level from the selected diagram is A33. FIRM Zone A0. The floor used as the reference level from the selected diagram is A33. FIRM Zone A0. The floor used as the reference level from the selected diagram is A33. FIRM Zone A0. The floor used as	er of the reference level from Section B, Item 7).  Light feet above or above or below (checking's lowest floor (reference) No Unknown GVD '29 Other (describe
equation under Comments on Page 2.)	
Elevation reference mark used appears on FIRM: Yes No (See Instructions on Page 4)	
The reference level elevation is based on: Tactual construction construction drawings (NOTE: Use of construction drawings is only valid if the building does not yet have the reference leves as this certificate will only be valid for the building during the course of construction. A post-construction be required once construction is complete.)	uction Elevation Certificate
The elevation of the lowest grade immediately adjacent to the building is: LIII51.0 feet NGV Section B, Item 7).	D (or other FIRM datum-see
SECTION D COMMUNITY INFORMATION	
If the community official responsible for verifying building elevations specifies that the reference level not the "lowest floor" as defined in the community's floodplain management ordinance, the elevation of as defined by the ordinance is:	on of the building's "lowest

REPLACES ALL PREVIOUS EDITIONS

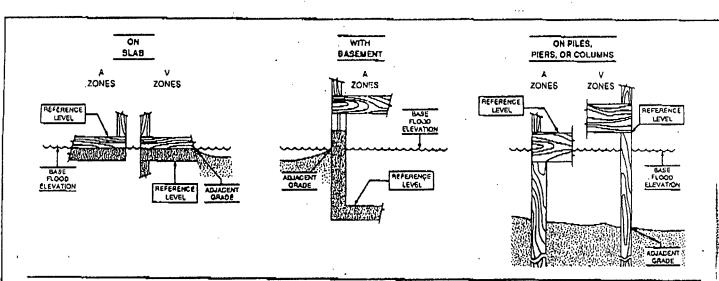

## SECTION E CERTIFICATION

This certification is to be signed by a land surveyor, engineer, or architect who is authorized by state or local law to certify elevation information when the elevation information for Zones A1-A30, AE, AH, A (with BFE),V1-V30,VE, and V (with BFE) is required. Community officials who are authorized by local law or ordinance to provide floodplain management information, may also sign the certification. In the case of Zones AO and A (without a FEMA or community issued BFE), a building official, a property owner, or an owner's representative may also sign the certification.

Reference level diagrams 6, 7 and 8 - Distinguishing Features—If the certifier is unable to certify to breakaway/non-breakaway wall, enclosure size, location of servicing equipment, area use, wall openings, or unfinished area Feature(s), then list the Feature(s) not included in the certification under Comments below. The diagram number, Section C, Item 1, must still be entered.

I certify that the information in Sections B and C on this certificate represents my best efforts to interpret the data available. I understand that any false statement may be punishable by fine or imprisonment under 18 U.S. Code, Section 1001.

The diagrams above illustrate the points at which the elevations should be measured in A Zones and V Zones.

Elevations for all A Zones should be measured at the top of the reference level floor.

Elevations for all V Zones should be measured at the bottom of the lowest horizontal structural member.
