SECTION II ELEVATION CERTIFICATION (Certified by a Local Community Permit Official or a Registered Professional Engineer,  Architect or Surveyor I												
of adversion												
FIRM ZONE A1-A30: I certify that the building at the property location described above has the fowest floor (including basement) at an elevation of 14,91 feet, NGVD (mean sea level) and the average grade at the building site is at an elevation of 5.9 feet, NGVD.												
FIRM ZONES V, V1-V30: I certify that the building at the properly location described above has the bottom of the lowest floor beam at an elevation of												
FIRM ZONES A, A99, AH and EMERGENCY PROGRAM: I certify that the building at the property facation described above has the lowest floor elevation offeet, NGVD. The elevation of the highest edjacent grade next to the building isfeet, NGVD.												
FIRM ZONE AO: I certify that the building at the property location described above has the lowest floor elevation of leet, NGVD. The elevation of the highest adjacent grade next to the building is												
SECTION III FLOODPROOFING CERTIFICATION (Certification by a Registered Professional Engineer or Architect)												
I certify to the best of my knowledge, information, and belief, that the building is designed so that the building is watertight, with walls substantially impermeable to the passage of water and structural components having the capability of resisting hydrostatic and hydrodynamic loads and effects of buoyancy that would be caused by the flood depths, pressures velocities, impact and uplift forces associated with the base flood.												
	YES D NO D In the event of flooding, will this degree of floodproofing be achieved with human intervention?  (Human intervention means that water will enter the building when floods up to the base flood level occur unless measures are taken prior to the flood to prevent entry of water (e.g., bolting metal shields over											
doors and windows).  YES CJ NO CI Will the building be occupied as a residence?  If the answer to both questions is YES, the floodproofing cannot be credited for rating purposes and the actual lowest floor must be completed and certified instead. Complete both the elevation and floodproofing certificates.
